

Anti-Human CD11b-167Er

Catalog: 3167011B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Reactivity: Human

Clone: ICRF44

Isotype: IgG1

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 167Er-anti-CD11b (ICRF44). Monocytes (top) and T lymphocytes (bottom) are displayed in the analysis.

Description

CD11b, also known as αM integrin, is a transmembrane glycoprotein. It is known to be involved in cell adhesion and phagocytosis. CD11b is expressed on the surface of many leukocytes involved in the innate immune system, including monocytes, granulocytes, macrophages, dendritic cells, and natural killer cells.
