

Anti-Human CD223/LAG-3-165Ho

Catalog: 3165037B

Package size: 100 tests

Storage: Store at 4 °C. Do not freeze.

Clone: 11C3C65

Isotype: Mouse IgG1

Formulation: Antibody stabilizer with 0.05% sodium azide

Technical Information

Validation: Each lot of conjugated antibody is quality control-tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended usage: The suggested use is 1 µL for up to 3×10^6 live cells in 100 µL. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs were incubated for three days in media alone (left) or with PHA (right) and then stained with 165Ho-anti-CD223/LAG-3 (11C3C65) and 168Er-anti-CD8a (SK1). Viable CD3+CD20- cells are displayed in the analysis.

Description

Lymphocyte activation gene 3 (LAG-3), also known as CD223, is a 70 kDa surface glycoprotein belonging to the Ig superfamily. LAG-3 shares homology with CD4, and LAG-3 binding to MHC class II is thought to contribute to the negative regulation of T cell activation. LAG-3 is expressed on T cells, including regulatory T cells and NK cells. Recently, it has been suggested that co-expression of CD49b and LAG-3 identifies human and mouse type 1 regulatory T (Tr1) cells.
