

Anti-Human CD235ab-163Dy

Catalog #: 3163008B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Human

Clone: HIR2

Isotype: Mouse IgG2b

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs with RBC spiked in and then stained with 163Dy-anti-CD235ab (HIR2). DNA-low events are displayed in the analysis.

Description

CD235a/b, also known as glycophorin isoform A and B, is the major sialoglycoprotein expressed on red blood cell membrane, and erythroid precursors. The HIR2 antibody recognizes this antigen on human red blood cells (RBCs) as well as on their developmental precursors.
