Anti-Human CD314-166Er

Catalog: 3166016B
Package Size: 100 tests
Storage: Store product at 4°C. Do not freeze.
Reactivity: Human

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10^6 live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Description

CD314, also known as NKG2D, is an activation receptor found on NK cells, gamma delta T cells, CD8+ T cells, and some CD4+ T cells. The Human NKG2D forms complexes with DAP10, a membrane adaptor protein, and has the ability to costimulate multiple NK activation receptors.
