

Anti-Human CD38-167Er

Catalog #: 3167001B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Chimpanzee

Clone: HIT2

Isotype: Mouse IgG1

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 167Er anti - CD38 (HIT2) and 165Ho anti-CD16 (3G8). Non-T and non-B viable cells are displayed in the analysis.

Description

CD38, also known as T10, is a transmembrane glycoprotein. It is expressed at variable levels across most human hematopoietic cells and in other tissues (i.e. Brain, muscle, kidney). It is expressed at the highest levels on plasma cells (memory B cells) as well as activated T and B cells.
