

## Anti-Human CD79b-162Dy

**Catalog #:** 3162008B

**Package Size:** 100 tests

**Storage:** Store product at 4°C. Do not freeze.

**Cross Reactivity:** Human

**Clone:** CB3-1

**Isotype:** Mouse IgG1

**Formulation:** Antibody stabilizer with 0.05% Sodium Azide

### Technical Information

**Validation:** Each lot of conjugated antibody is quality control tested by CyTOF<sup>®</sup> analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

**Recommended Usage:** The suggested use is 1 µl for up to 3 X 10<sup>6</sup> live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 147Sm-anti-CD20 (2H7) and 162Dy-anti-CD79B (CB3-1). Lymphocytes are displayed in the analysis.

### Description

CD79b, also known as Ig-Beta, is a type I integral membrane protein. Together with the Ig-Alpha chain (CD79a), it forms a heterodimeric complex that associates with membrane-IgM. CD79b is expressed exclusively in B lymphocytes and B cell lymphomas and depending on the maturation state of the B cell, is expressed either in the cytoplasm or on the cell surface. This CB3-1 monoclonal antibody reacts with human CD79b.
