Anti-Human IL-17F-172Yb

Catalog: 3172019B  
Clone: SHLR17  
Isotype: IgG1  
Package Size: 100 tests  
Storage: Store product at 4°C. Do not freeze.  
Reactivity: Human  
Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

**Validation:** Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

**Recommended Usage:** The suggested use is 1 µl for up to 3 X 10^6 live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Description

IL-17F is a homodimeric member of the of the interleukin (IL)-17 family, which also includes IL-17A, B, C, D, and E. The cytokines IL-17A and IL-17F are produced preferentially by proinflammatory T helper 17 (Th17) cells, with the other IL-17 family members are produced more widely. IL-17F and IL-17A have many overlapping functions, but knockout studies indicate that they have independent functions as well.
