Anti-Human IL-2-144Nd

Catalog: 3144021B
Package Size: 100 tests
Storage: Store product at 4°C. Do not freeze.
Reactivity: Human,

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10^6 live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Description

Interleukin-2 (IL-2), originally known as T cell growth factor (TCGF), is a cytokine that plays a critical role in promoting and controlling T cell responses and functions. IL-2 stimulates the survival, proliferation and differentiation of antigen-activated T cells and is required for the survival and function of regulatory T cells. Clone MQ1-17H12 antibody is a non-neutralizing antibody.
