Anti-Human Syk-149Sm

Pathologist-Verified Clone for Imaging Mass Cytometry™

Catalog: 3149024D
Package size and concentration: 25 µg, 0.5 mg/mL
Storage: Store at 4 °C. Do not freeze.
Reactivity: Human
Clone: 4D10.2
Isotype: Mouse IgG2a
Formulation: Antibody stabilizer with 0.05% sodium azide
Application: IMC-Paraffin

Technical Information

Application: The metal-tagged antibody is designed and formulated for the application of Imaging Mass Cytometry (IMC™) using the Fluidigm Hyperion™ Imaging System on formalin-fixed, paraffin-embedded (FFPE) tissue sections.

Quality control: Each lot of conjugated antibody is quality control-tested by Imaging Mass Cytometry on tissue sections.

Recommended concentration: For optimal performance it is recommended that the antibody be titrated for the desired application. Suggested initial dilution range: IMC-Paraffin: 1:25 to 1:100

Description

Syk is a cytoplasmic 72 kDa nonreceptor tyrosine kinase that plays an important role in intracellular signal transduction in hematopoietic cells. Syk is widely expressed in hematopoietic cells, including B lymphocytes, immature (CD4, CD8 double-negative and CD8 double-positive) thymocytes, myeloid cells, epithelial cell lines and normal breast tissue. The Syk kinase couples the activated immunoreceptors to downstream signaling events that mediate cellular proliferation, differentiation and phagocytosis.
