SAFETY DATA SHEET

Product Identifier: Maxpar® Cell Acquisition Solution Plus, for CyTOF® XT
Catalog ID numbers: 201244

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Contact information

General
Fluidigm Corporation
2 Tower Place, Suite 2000, South San Francisco, CA 94080
Main (U.S.): +1 (650) 266-6000
E-mail: techsupport@fluidigm.com

Emergency telephone number
+ (650) 266-6100 (outside US)
+ (866) 358-4354 (toll free)

Product identifier
Maxpar® Cell Acquisition Solution Plus, for CyTOF® XT, 1000 mL

Synonyms
Nitram®, ammonia nitrate

Trade names
None identified

Chemical family
Mixture; contains ammonium nitrate

Relevant identified uses of the substance or mixture and uses advised against
For Research Use Only. Not for use in diagnostic procedures.

Note
This SDS is written to address potential worker health and safety issues associated with the handling of the formulated product/mixture. Workers manufacturing this product/mixture should consult the SDS of each hazardous ingredient for hazard information and handling recommendations.

SECTION 2: HAZARDS IDENTIFICATION

Classification of the substance or mixture
The classification and labeling listed below is for bulk formulation.

Globally Harmonized System [GHS]
Not classified

Label elements

CLP/GHS hazard pictogram
None required

CLP/GHS signal word
None required

CLP/GHS hazard statements
None required

CLP/GHS precautionary statements
None required

Other hazards
No information was identified for the mixture. The mixture contains small amounts of ammonium nitrate. Ammonium nitrate is irritating to the eyes and may be irritating to the respiratory tract. Ingestion of ammonium nitrate may cause methemoglobinemia (a disorder where oxygen is inefficiently transported in the blood).

Note
This mixture does not meet criteria for classification under GHS as implemented by Regulation EC No. 1272/2008 (EU CLP), WHMIS 2015 (Health Canada), and Hazard Communication Standard No. 1910.1200 (US OSHA). Nevertheless, it should be handled with caution as it has not yet been fully tested.
SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

<td>229-347-8</td>
<td>&lt;0.1%</td>
<td>OS3:H272; EI2:H319</td>
</tr>
</tbody>
</table>

Note: The ingredient(s) listed above are considered hazardous. The remaining components are non-hazardous and/or present at amounts below reportable limits. See Section 16 for full text of GHS classifications.

SECTION 4: FIRST-AID MEASURES

Description of first-aid measures

Immediate medical attention needed: No

Eye contact: If irritation occurs or persists, notify medical personnel and supervisor.

Skin contact: Wash exposed area with soap and water and remove contaminated clothing/shoes. If irritation occurs or persists, notify medical personnel and supervisor.

Inhalation: Immediately move exposed subject to fresh air. If not breathing, give artificial respiration. If breathing is labored, administer oxygen. Immediately notify medical personnel and supervisor.

Ingestion: Do not induce vomiting unless directed by medical personnel. Do not give anything to drink unless directed by medical personnel. Never give anything by mouth to an unconscious person. Notify medical personnel and supervisor.

Protection of first-aid responders: See Section 8 for Exposure Controls/Personal Protection recommendations.

Most important symptoms and effects, both acute and delayed: See Sections 2 and 11.

Indication of immediate medical attention and special treatment needed, if necessary: Contains low levels of ammonium nitrate. Medical conditions aggravated by exposure: none known or reported. Treat symptomatically and supportively.

SECTION 5: FIREFIGHTING MEASURES

Extinguishing media: Water spray, alcohol-resistant foam, dry chemical or carbon dioxide

Specific hazards arising from the substance or mixture: No information identified. May emit carbon monoxide, carbon dioxide and nitrogen-containing compounds.

Flammability/explosivity: No information identified. As an aqueous solution, it is not expected to be flammable or explosive.

Advice for firefighters: Wear full protective clothing and a self-contained breathing apparatus with a full facepiece operated in the pressure demand or other positive pressure mode. Decontaminate all equipment after use.
SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures
If product is released or spilled, take proper precautions to minimize exposure by using appropriate personal protective equipment (see Section 8). Do not breathe dust/mist/vapors/spray.

Environmental precautions
Do not empty into drains. Avoid release to the environment.

Methods and material for containment and cleaning up
DO NOT CAUSE MATERIAL TO BECOME AIRBORNE. For small spills, soak up material with absorbent, e.g., paper towels. For large spills, cordon off spill area and minimize the spreading of spilled material. Soak up material with absorbent. Collect spilled material, absorbent, and rinse water into suitable containers for proper disposal in accordance with applicable waste disposal regulations (see Section 13). Decontaminate the area twice.

Reference to other sections
See Sections 8 and 13 for more information.

SECTION 7: HANDLING AND STORAGE

Precautions for safe handling
Wear appropriate protective equipment when handling. Avoid contact with skin and eyes. Avoid breathing vapor/mist/spray.

Conditions for safe storage including any incompatibilities
Store at 2–8 °C in tightly closed container. Avoid strong oxidizers. Store in sealed containers that are appropriately labeled.

Specific end use(s)
No information identified.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Note
Dispose of broken vials/syringes in a sharp container.

Control Parameters/Occupational Exposure Limit values

<table>

<th>Compound</th>
<th>Issuer</th>
<th>Type</th>
<th>OEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ammonium nitrate</td>
<td>--</td>
<td>--</td>
<td>--</td>
</tr>
</tbody>
</table>

Exposure/engineering controls
Control exposures to below the OEL (if available). Selection and use of containment devices and personal protective equipment should be based on a risk assessment of exposure potential. Use local exhaust and/or enclosure at aerosol/mist/generating points. Use engineered local exhaust ventilation (LEV) and/or enclosure for procedures where aerosolization may occur, such as opened transfers, pumping, and spraying. Solutions can be handled outside a containment system or without LEV during procedures with no potential for aerosolization. All containers for solutions and slurries must be covered while being transferred.

Respiratory protection
Choice of respiratory protection should be appropriate to the task and the level of existing engineering controls. At a minimum, a tight-fitting full-face respirator with high-efficiency particulate air (HEPA) filters is required when performing aerosol-generating operations. A powered air-purifying respirator (PAPR) with HEPA filters and head cover is required for spill cleanup.

Hand protection
Wear nitrile or other impervious gloves if skin contact is possible. When the material is diluted in an organic solvent, wear gloves that provide protection against the solvent.

Skin protection
Wear appropriate gloves, lab coat or other protective overgarment if skin contact is likely. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use.

Eye/face protection
Wear safety glasses with side shields, chemical splash goggles or full face shield, if necessary. Base the choice of protection on the job activity and potential for contact with eyes or face. An emergency eye wash station should be available.
SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Environmental exposure controls
Avoid release to the environment and operate within closed systems wherever practicable. Air and liquid emissions should be directed to appropriate pollution control devices. In case of spill, do not release to drains. Implement appropriate and effective emergency response procedures to prevent release or spread of contamination and to prevent inadvertent contact by personnel.

Other protective measures
Wash hands in the event of contact with this product/mixture, especially before eating, drinking or smoking. Protective equipment is not to be worn outside the work area (e.g., in common areas or out-of-doors).

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

SECTION 10: STABILITY AND REACTIVITY

Reactivity
Ammonium nitrate may react with strong bases.

Chemical stability
Stable under normal temperatures and pressures

Possibility of hazardous reactions
No information identified

Conditions to avoid
No information identified

Incompatible materials
Reducing agents, powdered metals, strong acids

Hazardous decomposition products
No information identified

SECTION 11: TOXICOLOGICAL INFORMATION

Information on toxicological effects

Route of entry
May be absorbed by inhalation, skin contact and ingestion

Acute toxicity

</tbody>
</table>

Irritation/corrosion
Ammonium nitrate is not irritating to rabbit skin but was irritating to rabbit eyes.

Sensitization
Not a skin sensitizer

STOT: single exposure
No studies identified

STOT: repeated exposure/repeat-dose toxicity
No effects were reported at inhalation doses up to 1 mg/m², 6 hours/day, 5 days/week, for 4 weeks.

Reproductive toxicity
No studies identified

Developmental toxicity
No studies identified

Genotoxicity
Ammonium nitrate was negative for mutagenicity in an Ames assay.

Carcinogenicity
No studies identified. This mixture is not listed by NTP, IARC, ACGIH or OSHA as a carcinogen.

Aspiration hazard
No data available

Human health data
See Section 2, "Other hazards"

#### Toxicity

**Additional toxicity information**
No data identified

**Persistence and degradability**
No data identified

**Bioaccumulative potential**
No data identified

**Mobility in soil**
No data identified

**Results of PBT and vPvB assessment**
Not performed

**Other adverse effects**
No data identified

**Note**
The environmental characteristics of this product/mixture have not been fully investigated. The above data are for the active ingredient and/or any other ingredient(s) where applicable. Although present at low concentrations, disposal should consider that ammonium nitrate is present. Releases to the environment should be avoided.

### SECTION 13: DISPOSAL CONSIDERATIONS

**Waste treatment methods**
Dispose of wastes in accordance to prescribed federal, state and local guidelines, e.g., an appropriately permitted chemical waste incinerator. Do not send down the drain or flush down the toilet. All wastes containing the material should be properly labeled. Rinse waters resulting from spill cleanups should be discharged in an environmentally safe manner, e.g., appropriately permitted municipal or onsite wastewater treatment facility.

### SECTION 14: TRANSPORT INFORMATION

**Transport**
Based on the available data, this mixture is not regulated as a hazardous material/dangerous good under EU ADR/RID, US DOT, Canada TDG, IATA or IMDG.

**UN number**
None assigned

**UN proper shipping name**
None assigned

**Transport hazard classes and packing group**
None assigned

**Environmental hazards**
Based on the available data, this mixture is not regulated as an environmental hazard or a marine pollutant.

**Special precautions for users**
No special precautions needed. Avoid release to the environment.

**Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code**
Not applicable

**Hazchem Code/HIN**
None assigned
SAFETY DATA SHEET

Product Identifier: Maxpar® Cell Acquisition Solution Plus, for CyTOF® XT
Catalog ID numbers: 201244

SECTION 15: REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture

This SDS generally complies with the requirements listed under current guidelines in the US, EU and Canada. Consult your local or regional authorities for more information.

Chemical safety assessment

Not conducted

TSCA status

Ammonium nitrate is listed.

SARA Section 313

Nitrate compounds are listed.

California Proposition 65

Not listed.

Component analysis: state

Ammonium nitrate is listed in MA, NJ, PA and RI.

Component analysis: chemical inventory

Ammonium nitrate is listed in the chemical inventory of the following countries: Australia, Canada, China, EU, Mexico, New Zealand, the Philippines and Vietnam.

Additional information

No other information identified

SECTION 16: OTHER INFORMATION

NFPA Ratings

Ammonium nitrate Health: 0 Fire: 0 Reactivity: 3

Full text of H phrases and GHS classifications

OS3, Oxidizing solid Category 3; H272, May intensify fire, oxidizer; EI2, Eye irritant Category 2; H319, Causes serious eye irritation.
